Office laminator

Laminator - OPUS uniLAM A4

Catalogue number: 400218

A unique design, easy to use, small compact laminator with the newest hot roller technology.

Description

UNILAM A4 - OFFICE LAMINATOR FOR A4 SIZE

Lamination is a great way to **protect your documents from forgery, dust, stains and any damage** that could damage your documentation due to transportation, improper storage, everyday use or the passage of time. It is also a perfect **protection of the appearance of the paper** - laminating the sheet **prevents it from creasing or yellowing**, and also allows you to quickly **remove impurities from the foil**. The **UniLAM A4** office laminator

will help you achieve this effect - you will be able to enjoy the **aesthetics and safety** of your documents.

QUIET AND EFFICIENT OPERATION

UniLAM A4 is an easy-to-use laminator that will work in any **home or office**. With it, you can prepare aesthetically pleasing and effectively protected against harmful factors **office documents, invoices, receipts, leaflets, information signs, business cards** and other materials of **A4** and smaller. The device works **quietly and efficiently**, lamination is carried out using **modern technology of heated rollers**. There are **two lamination modes: cold and hot**.

COLD AND HOT LAMINATE

Lamination takes place with **with a speed of 300 mm/min** and can be done in two modes:

- **Hot lamination**: is the right choice for most documents, such as photos, information signs, office documents, etc. The laminator's heated rollers will activate the adhesive contained in the foil and secure your document precisely.
- **Cold lamination**: it will work primarily in the case of documents covered with ink that is not resistant to high temperatures. You don't have to wait for the device to reach the right operating temperature - the foil will stick to the paper only by pressing the laminator rollers.

WHICH LAMINATING FILMS?

UniLAM A4 supports a variety of pouches: **hot and cold lamination**, **A4 and smaller**, thicknesses **from 80 up to 125 µm**. Using the **temperature regulator** located on the front of the device, you can easily adjust the settings to the type of foil used. The rollers will precisely merge its sides so that there are no gaps through which dirt or moisture could get into the document.

ABS ANTI-LOCK SYSTEM

If the document jams inside the device or it is necessary to stop lamination due to, for example, incorrect insertion of the document into the slot, **use ABS button**. It will allow you **easy and safe removal of foil from the laminator**.

BASIC EQUIPMENT FOR EVERY HOME AND OFFICE

Thanks to compact dimensions and simple handling, the UniLAM A4 laminator will be successfully used both **houses** and **offices** or **other institutions**. The protective foil will effectively **protect office documentation, receipts, photos** or other **souvenirs** that could be damaged, stained or destroyed in any way.
