Electric binding machine

Binding equipment - OPUS MBE 300

Catalogue number: 604012

Electric version of the most popular OPUS MB 300 binding machine.

Description

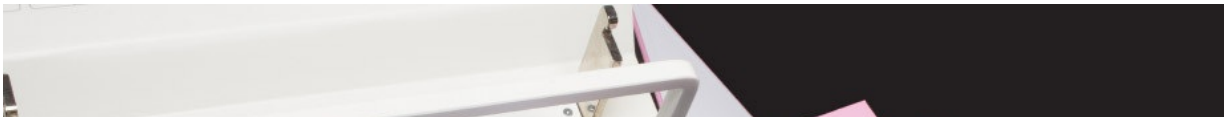

MBE 300 – FULLY ELECTRIC CHANNEL BINDING MACHINE

MBE 300 is a **fully electric** device for binding and unbinding documents up to **300 sheets thick** in the **METALBIND** and **C-BIND** systems (additional equipment required). You operate the binder by pressing the appropriate buttons – nothing more! The MBE 300 is equipped with binding force adjustment and a binding counter, and the selection of the appropriate channel or cover is **automatic**. This binding machine is perfect for large offices and service outlets where many documents are bound daily and where time and precision are crucial. You can use it to create aesthetically pleasing designs: marketing offers, presentation materials, and catalogs, as well as bind theses or prepare documents for archiving.

REFINED CLAMPING MECHANISM AND SOLID METAL CONSTRUCTION

The MBE 300 has one movable jaw driven by two screws connected to the motor by a toothed belt – this mechanism ensures parallel jaw guidance, which guarantees even and precise clamping of the canal. The maximum jaw pressure is 2.3 tons. The motor is monitored by a microprocessor controller with an LCD display, and the solid metal construction ensures stable operation and durability of the device.

AUTOMATIC CHANNEL AND COVER SELECTION

The binding machine is equipped with **automatic channel or cover selection**, which allows you to accurately match the appropriate METALBIND channel or C-BIND cover to the number of sheets being bound. Simply place the cover with the document on the debinding plate and press both START buttons – the suggested channel size will **appear on the display**. When binding using the C-BIND system, place a stack of sheets on the debinding plate – the cover size will appear on the display.

EASY TO USE THANKS TO THE LCD DISPLAY AND BUTTONS

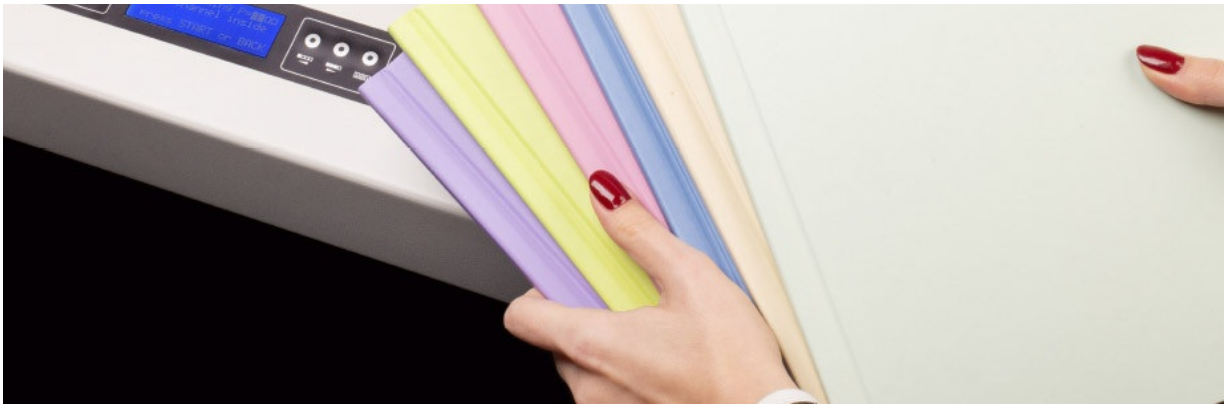

The device is equipped with an **LCD display** that facilitates operation through displayed messages. The panel also features buttons that allow you to easily switch between binding, measurement, and **debinding modes**, as well as **adjusting the binding force**. Additionally, the MBE300 is equipped with a **binding counter** – current and total – that can be reset at any time. Controlling the binding jaw and performing binding or debinding is done by using **three buttons** located on the side of the device. To bind, you need to **hold down two START buttons** – this solution allows you to maintain maximum security and avoid accidental starting of the device.

A WIDE RANGE OF COVERS AND PERSONALIZATION

With the MBE 300 channel binder, you can bind documents in **various types of covers**: hard, soft, transparent, in various colors, sizes, and textures. You can use both **METALBIND** and **C-BIND** covers. It's also possible to create a personalized binding using **matrices** and **fonts** – you choose what will be on your cover! Furthermore, thanks to the non-invasive nature of the channel system, you can reuse the cover and channel after unbinding the document.

ACCESSORIES AND ADDITIONAL EQUIPMENT

The device **includes accessories** for binding and debinding in the **METALBIND** system: a binding insert, a debinding wedge and an attachment for debinding channels 1.5 mm – 3 mm. The wedge storage area is located in the lower cover of the binding machine, between the recesses that make it easier to carry the device.

NOTE! To use the binding machine in the C-BIND system, you must purchase the appropriate accessories: O.CB Pivot Inserts for MBE300, O.CB Debinding Tool for Atlas300 / MB300 / MBE300, and an attachment for debinding AA channels.

BIND QUICKLY AND PRECISELY – WITH THE MBE 300 CHANNEL BINDING MACHINE!

Well-bound documents are the foundation of good office organization. They're also the calling card of any company – professionally prepared sales and presentation materials build customer trust from the very first moment. With the professional MBE 300 binding machine, you'll achieve this effect in no time!

ADVANTAGES OF THE MBE 300 CHANNEL BINDING MACHINE

- Fully electric – button operation
- Automatic selection of channel and cover sizes
- Metalbinding and C-BIND systems
- Maximum binding capacity: 300 sheets (80 g/m²)
- Binding force adjustment
- Binding counter – current and total
- Fast binding
- Perfect binding appearance, wide range of covers and channels
- Document security – binding without glue, stapling, or punching

Parameters

Brand	OPUS
Binder type	channel
Maximum binding format	A3 (short side only)
Maximum number of bound pages*	300

Operation type	electric
Metal housing	yes
Net weight	45 kg
Gross weight	52 kg
Height	270 mm
Width	410 mm
Depth	362 mm
* tests made on paper	80 g/m²
Device warranty	2 years
Feature / purpose	Electric binding machines, Office binding machines
Binding system	METALBIND, C-BIND
