Hot print stamping equipment

Digital foil printer - Foil Xpress Auto Position

Catalogue number: 807048

The Foil Xpress with auto position is a compact, desktop foil printer.

Description

Foil Xpress Auto Position

The Foil Xpress with auto position is a compact, desktop foil printer that is an essential addition to the hot print stamping and embossing system. It replaces traditional silk screening and pad printing methods currently used to print on: office/pocket planners and diaries, book covers, invitations, speciality and novelty items. Foil Xpress printer reduces significantly costs, direct and indirect, dramatically reducing set up time, matrix's dies, silk screens, inks, and solvents used in traditional printing methods.

The system is very cost effective for, individual, short, long and personalized runs. The software runs on most computers, laptops with text and graphics instantly. It is simple, safe and easy to use. It produces a sharp durable image on demand. Foil Xpress printhead can print hot or cold, bonding the unique digital decorative foil called O.digiFOIL onto your projects, the film passes under the printhead, where it applies hot or cold pressure, which makes the image transfer from the film to the product. The Foil Xpress Auto Position can print multiple lines at one time, perfect for large designs and logos.

WARNING!!

The maximum printing area (W x H): 203 x 305 mm is made of five prints (5 strips) with maximum dimensions (W x H): 57 x 203 mm and a margin of 2 x 10 mm. May occur a slight offset between prints (strips).
