Paper void fill equipment - OPUS chartiPACK HC

Catalogue number: 906185

Paper void fill equipment.

Description

PACK WITH PAPER FEED DEVICE

Paper is a cheap, attractive, environmentally friendly, easy to use and, above all, effective solution for packaging parcels. With a honeycomb paper feed, you can make your job considerably easier and create a package that will please the eye of every customer

ONE DEVICE - EVERYTHING YOU NEED

ChartiPACK HC is a professional, easy-to-use notched sheet feeder, also known as "honeycomb paper" or "wrap paper". The machine wraps your products with extreme precision. The dispenser evenly stretches the paper, which when unfolded forms a soft, three-dimensional honeycomb web. The tightly adhered layers produce an effect similar to stretch wrapping - no cutting tools or adhesive tape needed! You can also use paper without notches in the roll.

EASY TO INSTALL

To prepare the machine for operation, simply place it on a flat surface, install the notched paper roll on the rear feed roller and the spacer paper roll on the front roller. After connecting the power cord and feeding the paper through the exit slot, the machine will be ready for use.

WORKING IN TWO WAYS

The notched paper dispenser has two modes of operation, allowing you to adapt the packaging process to your needs and preferences.

- Start/pause button: simply press the start/pause button to start or stop the automatic paper feeding at any time. Save yourself work and time by packing everything you have to pack in one go!
- Foot pedal: press the foot pedal or release it to start or stop the feeder. By dosing the material with the pedal, you will have more control over the length of the pieces you need to pack. This is an option for those who don't like to be in a hurry, but who like their packages perfectly packed.

BETTER FIT, BETTER PROTECTION

The high elasticity of the honeycomb paper means that this one adapts perfectly to the size and shape of any products. With the device, you stretch the material evenly to protect your parcels even better, and an extra layer of paper that you can mount on a second roller will protect delicate and

scratch-prone items from shocks so they arrive intact to the recipient of the parcel.

FILL THE SPACE

The notched paper is also perfect as aADVANTAGES OF HONEYCOMB PAPERfiller for parcels - after stretching it significantly increases its volume, thanks to which you can easily fill every nook and cranny of the packaging! This protection will cushion even the most delicate products - such as glass or electronics - and protect them from vibrations and other dangers, including getting wet.

INSTEAD OF DECORATIVE PAPER

The honeycomb paper is also suitable as decorative gift wrapping paper. Make your gifts stand out with minimalist, aesthetic packaging! ;)

REDUCE STORAGE AND TRANSPORT COSTS

Not only does notched paper provide more packaging capacity, it also saves space - a roll of honeycomb paper almost doubles in length and volume when stretched! In addition, the low weight of the material means lower transport costs.

ECOLOGICAL AND BIODEGRADABLE

Honeycomb paper is made from kraft paper, which is currently one of the most environmentally friendly materials used in industry. It is renewable, recyclable and compostable, and the fact that no additional materials are needed to pack the goods being shipped makes honeycomb paper an extremely economical, easy-to-use and environmentally friendly solution.

ADVANTAGES OF HONEYCOMB PAPER

- aesthetic and original appearance of the packaged products
- multifunctional - can be used as wrapping paper, decorative paper or parcel filler
- ease of storage
- multiple use
- safety, shock and vibration absorption
- recyclable and compostable, environmentally safe
- no additional tools required for packaging

PACK WISELY - PACK IN PAPER!

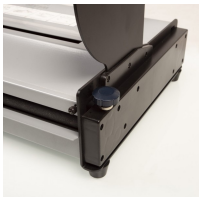

Good, fast and environmentally friendly packaging is the best flag ship of any retailer. Now you can prepare paper fillings with ChartiPACK in no time at all.

Parameters

Brand	chartiPACK
Maximum speed	8 m/min
Pedal switch tap	yes
Automatic mode	yes
LCD display	no
Power	50 W
Net weight	13.65 kg
Gross weight	15 kg
Height	280 mm
Width	720 mm
Depth	330 mm
Device warranty	2 years
Feature of the device	Footswitch control (included)
Supported papers	honeycomb paper - width 510 mm, diameter 250 mm, z-fold paper - width 300 mm, diameter 200 mm
