Air packaging equipment

Air packaging equipment - OPUS aeroPOUCH 9 Pro

Catalogue number: 906154

Air packaging equipment.

Description

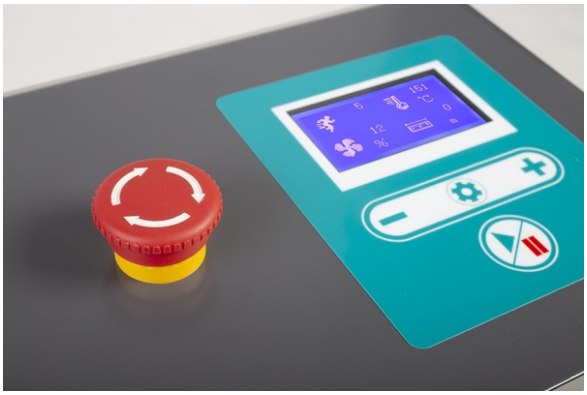

WELL PACKAGED - DEVICES FOR INFLATING CUSHIONS OR FOIL MATS

We send parcels every day and we want them to be well packed, protected, look great and take no time at all to pack. Now it is possible. Everyone who will be packing and everyone who will be unpacking your parcel will appreciate the functionality, economy and appearance of a parcel filled and secured with air cushions or air mats!

SIMPLE HANDLING, SIMPLE OPERATION

The AeroPOUCH 9 Pro is a universal, easy-to-use **air cushions and air mat filler** that protects your shipments aesthetically and effectively. You can easily plan the entire filling process in the programmable function mode and obtain fillers perfectly tailored to your needs. If you do not operate the machine for 30 minutes, it will go into **energy-saving mode**, reducing your electricity consumption.

FULL CONTROL

The device is equipped with a **control panel** which allows you to set all the parameters needed for the production of fillers. Press the function selector and adjust the film **speed**, sealing **temperature**, **airflow** and the **length** of the film you want to produce. Once all the settings have been made, simply press the start/pause button or use the footswitch to start the production of fillings.

SET THE FILM SPEED - SAVE TIME

Adjust the speed of your air cushions and air mat production as you wish - the machine can produce air cushions at speeds of up to **20 metres per minute!** Save yourself time and effort when packing - with the AeroPOUCH 9 Pro airbag inflator you pack your shipments **quickly and easily**.

ADJUST THE TEMPERATURE - EXPAND YOUR OPTIONS

The option to adjust the sealing temperature allows the machine to use different types of film. Select any film, set the value up to 180°C and get air fillers **perfectly matched** to the products you are sending!

REGULATE AIRFLOW - EFFECTIVELY PROTECT SHIPMENTS

The airflow control will allow you to adjust the pressure at which the cushions and mats are inflated to achieve the resilience of the fillings that your shipment requires. This ensures that your shipments are **effectively protected** against shocks, vibrations and temperature fluctuations.

ADJUST FOIL LENGTH - DO NOT WASTE MATERIAL

The air filler offers the user the possibility to automatically adjust the length of the film to be inflated. With this option you produce exactly as many cushions as you need – do not waste material and **save money!**

PROTECT THE ENVIRONMENT

Cushions and air mats are a fully ecological solution for packing shipments. Such fillers can be reused many times; moreover, the material (HDPE) from which the foils are made is biodegradable

and non-toxic - and therefore safe for both humans and the environment.

ADVANTAGES OF aeroPOUCH AIR FILLERS

- low weight - lower transport costs
- the filling does not spill, does not get dirty and is aesthetically pleasing
- safety, shock and vibration absorption
- protection against temperature changes
- optimally low material consumption
- recyclability, ecology
- ease of storage
- perforation allows for convenient tearing off
- multiple use

PACK IT SO IT IS NICE TO UNWRAP IT ;)

Well and effectively packaged goods are the flagship of the seller, it is the attention to every detail that makes the customer fully satisfied.

Parameters

Brand	aeroPOUCH
Maximum speed	20 m/min
Power	300 W
Air pressure indicator	yes
Air pressure adjustment	yes
Pedal switch tap	yes
Air cushion support	yes
Air mat support	yes
Net weight	17 kg
Gross weight	22.5 kg
Height	385 mm
Width	270 mm
Depth	280 mm
Device warranty	2 years
Feature of the device	Footswitch control (included)
Supported film rolls	Width 200 mm (length up to 600 m), Width 400 mm (length up to 500 m)
