Hand binder

Binding equipment for plastic combs - OPUS Bingo

Catalogue number: 100156

Binding equipment designed for binding documents with a plastic combs.

Description

Bingo – a practical solution for everyday work

Binding is a proven way to organize documents and protect them from damage, and it also helps maintain the aesthetics of various materials. The Bingo binding machine for plastic spines is perfect not only for offices, schools, and service outlets, but also for home use. It allows you to prepare neat presentations, projects, offers, instructions, and term papers, giving them a professional touch.

Compact binding machine for plastic spines

Bingo is a functional office device designed for binding A4 documents. It allows you to punch up to 8 sheets of 80 g/m² paper at a time and bind stacks of up to 145 sheets (16 mm spine). The spine-stretching mechanism works smoothly, significantly streamlining the binding process and reducing user effort.

Precision that makes the difference

The device is equipped with a paper stop that allows for precise positioning of sheets before perforation. Additionally, a clear table on the base of the binding machine makes it easy to select the appropriate spine size for the number of pages. This ensures that each binding is evenly punched, aesthetically pleasing, and tailored to the document's content.

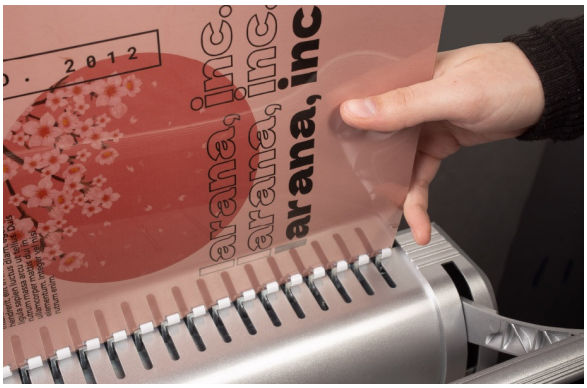

Compact design and ease of use

The small size means that the binding machine will easily fit even on a small desk, without taking up much space. **The stable metal construction** ensures comfortable work, and the built-in **shred container** allows for quick waste removal and effortless organization.

Adjust the setting to your needs

A wide selection of compatible plastic spines and covers allows for full document personalization. The variety of colors and formats allows for matching bindings to both formal materials and less formal projects, emphasizing their character and purpose.

Features of the Bingo binding machine for plastic spines

- Designed for binding A4 documents using plastic spines.
- Ability to bind documents in soft covers.
