Water dispenser

Water dispenser - Opus Miraqua Delta

Catalogue number: 905737

Description

MIRAQUA DELTA - THE MULTIFUNCTIONAL WATER DISPENSER THAT DRAWS WATER STRAIGHT FROM THE MAINS!

The Miraqua DELTA is a **multifunctional water** dispenser that **filters**, **mineralises**, **heats** and **cools** water drawn directly from the mains. The dispenser offers up to **6 different** water **temperatures.** The dispenser's ergonomic design means that DELTA takes up very little space and fits easily into any kitchen worktop at **home** or in the **office**, as well as in rooms such as **meeting rooms** or **waiting rooms**.

WATER FOR THE HEALTH OF YOU AND YOUR FAMILY

Free of harmful substances, clean and enriched with minerals, water is **an important part of the daily diet**. It is assumed that we should drink about 30 ml of water per kilogram of body weight every day, which is about 2 litres of water for an adult. The Miraqua DELTA will ensure that you have constant access to the best quality water and will help you ensure that everyone **in your family** is properly hydrated **-** everyone can easily make the **drink they like.** In addition, the **hot water lock icon** will help you protect your children from accidental scalding.

WATER OF THE HIGHEST SANITARY QUALITY

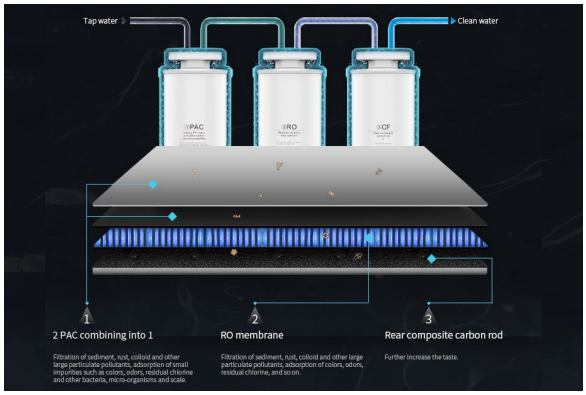

The Miraqua DELTA dispenser is equipped with a **UV-C lamp**, which has a **germicidal** and **bacteriostatic** effect, making the water supplied completely **safe** for consumption (it does not exceed the COD - chemical oxygen demand - standard).

MULTI-STAGE FILTRATION SYSTEM

Water purification in the Miraqua DELTA dispenser is carried out using the most effective method - reverse osmosis. The unit is equipped with 3 filters:

- PAC filter - eliminating particulates;
- RO (reverse osmosis) membrane - removing fine particles and bacteria;
- CF (carbon fibre) composite filter - which improves the taste of the water and eliminates unpleasant colour.

Changing the filters is incredibly easy - simply remove the lid of the unit and turn the selected used filter counterclockwise, while to fit a new filter, turn it clockwise. In addition, you will be alerted to the **need to change the filters by the indicators** on the display, which will light up red when a filter is completely worn out.

HOT WATER IN 3 SECONDS!

The water heating system works with a **core of refined steel**. Thanks to this state-of-the-art technology, the process of heating the water in the DELTA dispenser takes **just 3 seconds**, as the heat penetrates very quickly into every water molecule. Easy and constant access to hot water is **a major convenience in everyday life** - you don't have to wait long for the water to boil or use reheated water that loses its quality.

PAC FILTER

Eliminates the biggest harmful particles and impurities from the water, such as sand, rust, colloids and chlorine residues. Removes unpleasant odours and colouring substances. **The recommended replacement frequency for this filter is 6 to 12 months**.

RO MEMBRANE (REVERSE OSMOSIS)

The purpose of the RO membrane is to remove fine contaminants, bacteria, pesticide residues, micro-organisms, organic matter, chlorine residues, radioactive particles and scale. Advanced reverse osmosis technology removes contaminants as small as 0.0001 µm. **The recommended replacement frequency for this filter is 12 to 24 months**.

CF COMPOSITE FILTER (CARBON FIBRE)

It improves the taste and removes substances responsible for unpleasant water colour. **The recommended replacement frequency for this filter is 6 to 12 months**.

HYDRATION DOESN'T HAVE TO BE A CHORE - DRINK WHAT YOU LIKE!

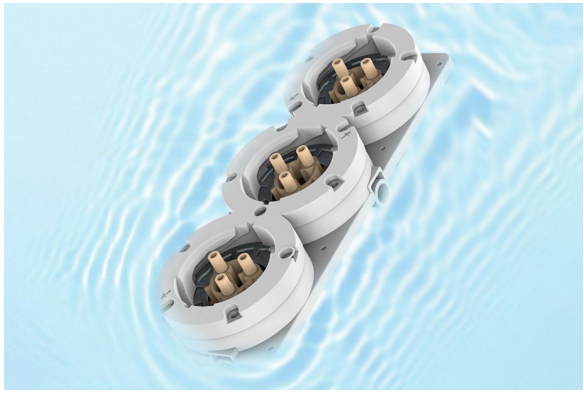

The Miraqua DELTA is a great choice for all connoisseurs of hot and cold drinks, as well as for any parent concerned about the health of their little one. You can obtain the perfect water for coffee, tea, cold lemonade or modified milk with just one device. DELTA offers **6 levels of water temperature**:

- water at room temperature,
- 8-12°C: cold water,
- 45-48°C: water for milk,
- 82-86°C: water for coffee,
- 88-92°C: water for tea,
- 90°C and above (controllable): hot water.

In addition to the option of continuous water dispensing, the dispenser also allows you **to choose the amount of water to be poured**: a small cup of **150 ml** or a large cup of **300 ml**.

PERFECTLY DESIGNED DEVICE

The construction of the dispenser has been designed with the utmost **attention to detail**. The filter elements are equipped with **an integrated water manifold**, which increases the efficiency and reliability of the unit's operation by **reducing the risk of leakage**. The manifold is designed for pressures up to 3.6 MPa.

ADVANTAGES OF THE MIRAQUA DELTA WATER DISPENSER:

- Multi-stage filtration system.
- Supplied directly from the mains water supply.
- Built-in **UV-C sterilising lamp**.
- Water **heating, cooling** and water **mineralization** function.
- Heating water in just **3 seconds**.
- 6 pre-programmed water temperature **levels**.

- 6 pre-programmed water temperature **levels**.

Parameters

Brand	Miraqua
Filter efficiency	132 L per day
Water inlet temperature	5-38 °C
Working pressure	400-600 kPa
Built-in water tank capacity	2 L
Water heating	yes
Water cooling	yes
Filter insert included	yes

Filter insert included	yes
Distance of the tap to the ground	29 cm
Distance of the tap to the base (drip cap)	24.5
Power supply	220 - 240 V, 50 / 60 Hz
Net weight	9.6 kg
Gross weight	12.1 kg
Height	430 mm
Width	240 mm
Depth	360 mm
Device warranty	2 years
Filter feature	Table top, With mineralisation, With heating function, With cooling function
Responsible manufacturer	**OPUS Sp. z o. o.** Polska 44-122 Gliwice Toruńska 8 info
