Water dispenser

Water dispenser - OPUS Miraqua Omega

Catalogue number: 905768

Description

MIRAQUA OMEGA – MULTIFUNCTIONAL DISPENSER THAT FILTERS, MINERALIZES, COOLS, HEATS AND CARBONATES WATER

Miraqua OMEGA is a modern water dispenser that filters, mineralizes, heats, cools and carbonates the water served. Thanks to it, you gain quick access to clean, healthy drinking water at **various temperatures and in various quantities**. The ergonomic housing and the possibility of choosing the **method of water supply** - using a filled tank or hoses - allow you to use the dispenser anywhere: kitchen, office, conference room, waiting room, reception and many others. You can operate the device intuitively using the application or **touch screen**, where you will also find all the necessary information about the condition of the device or the service life of the filter cartridge.

DRINK WATER YOUR WAY: WARM, COLD, SPARKLING – THE CHOICE IS YOURS!

Hydration doesn't have to be a chore - drink the water you like! Miraqua OMEGA gives you access to crystal clear water enriched with health-beneficial minerals in your favorite version: **sparkling, chilled, warm** or **at room temperature**. Plus, **with one click** you can easily adjust the **amount of water you drink** - so you get just the amount you need without wasting a single drop of water!

FROM HOT COFFEE TO REFRESHING LEMONADE – THE PERFECT WATER FOR EVERY DRINK

Did you know that in order for individual drinks to retain their nutritional value after preparation, they must be prepared using water at a **specific temperature**? Coffee steeped in boiling water loses its flavor, black tea tastes best steeped in water at a temperature of about 95°, and if you drink water with honey and lemon every morning - remember that honey loses its nutritional properties at temperatures higher than 40°. Sounds complicated? Not with OMEGA! **Forget about waiting** for water to boil, cool down or chill in the fridge - the dispenser will give you **ready-to-drink water at any temperature**:

- chilled water (temperature control possible),
- water at room temperature,
- hot water: 40°C, 50°C, 60°C, 70°C,
- 45°C: water for baby formula,
- 85°C: water for coffee,
- 95°C: water for tea.

QUICK AND EASY PREPARATION OF MILK FOR YOUR BABY – EVEN IN THE MIDDLE OF THE NIGHT

Miraqua OMEGA is also a great choice **for parents**. The device eliminates the need to buy mineral water, milk warmers or wait for boiled water to cool down. This is a great convenience especially when **the child wakes up at night**, when it needs to be fed as soon as possible. The dispenser allows you to prepare **formula milk** using **crystal clear and completely safe** water for the child, free of chemicals, bacteria or viruses. **In just a few moments** you will receive a meal at the ideal temperature - on the screen you will find a special tile designed for adding water to milk at a temperature of **45°C**, you do not have to set anything yourself. After selecting this option, you can immediately select **the amount of water to be given** according to the amount of milk in the bottle. That's all you need to quickly prepare **completely safe, tasty and temperature-appropriate milk** for your baby.

4 IN 1 FILTER CARTRIDGE – EFFECTIVE CLEANING AND MINERALIZATION IN ONE

Water filtration in the dispenser is carried out using **only one cartridge**, combining the functions of cartridges known for their effectiveness for other Miraqua dispenser models, such as:

- **PAC filter** responsible for removing impurities such as mud, rust, sand, suspensions;
- **RO (reverse osmosis) membrane** removing small impurities, bacteria, pesticide residues, microorganisms or chlorine residues;

- **CF composite filter** improving the taste and smell of water,
- **mineralizer** enriching water with minerals beneficial to health in a concentration safe for the body.

The recommended replacement frequency for this filter is **24 months**.

UV-C LAMP – THE HIGHEST QUALITY WATER IN SANITARY TERMS

The Miraqua OMEGA water dispenser is equipped with a **UV-C lamp** that has a **bactericidal** and **bacteriostatic** effect, which makes the water supplied completely safe for consumption (it does not exceed the standard level of COD - chemical oxygen demand).

WATER FROM THE NETWORK OR IN A TANK – ADJUST THE DISPENSER TO YOUR CAPABILITIES

Miraqua OMEGA responds not only to your needs, but also to your possibilities. **Choose the method of water supply** - you can use a 5-liter **tank** with a comfortable handle or connect the dispenser to **the water supply network**. Thanks to this, you can place the device anywhere: office, home, waiting room, reception, conference room, any recreational or sports facility and wherever you want - the need for access to the network is not a limitation!

OPERATION BY TOUCHSCREEN OR APPLICATION

Operating the Miraqua OMEGA dispenser is something you already know and are good at – using the touch panel is similar to using a phone or tablet. The display features **clear icons, visualizations, specific captions, precisely formulated commands** and all other information needed for **quick, intuitive and safe operation of the device**. The system will efficiently guide you through the next stages of selecting the **type, temperature and amount of water** to be dispensed, and from the main menu you can easily go to the settings, where you will find options such as: **checking the level of filter wear, cleaning the device** or **UV sterilization of water**. The display also allows you to easily turn on **the screen lock** so that the device **cannot be accidentally turned on by children**. You can also operate the dispenser using the popular **Tuya application**.

ADVANTAGES OF THE MIRAQUA OMEGA WATER DISPENSER

- **Multi-stage** filtration system.
- Possibility of connecting the device to the **water supply network** or using **a tank**.
- Built-in **UV-C sterilizing lamp**.
- Water **carbonation function**.
- Water **heating** and **cooling** function.
- Programmed water temperature levels.
- Programmed amounts of water supplied.
- Lower cost of drinking water compared to bottled water.
- No need to order and store bottles.
- **Reduced plastic consumption**.
- Touch screen.

- Information on the consumption of individual filters.
- Intuitive filter replacement without the need for tools or specialist service.
- Smart cleaning function.
- **Child lock**.
- Convenient **Child lock** magnetic drip tray.
- Convenience of use and **immediate access to drinking water**.

Parameters

Brand	Miraqua
Filter efficiency	748,8 L per day
Water inlet temperature	5-38 °C
Working pressure	400-600 kPa
Built-in water tank capacity	5 L
Internal water tanks capacity	2 l
Water heating	yes
Water cooling	yes
Filter insert included	yes
Distance of the tap to the ground	25 cm
Distance of the tap to the base (drip cap)	22
Power supply	220 - 240 V, 50 / 60 Hz
Net weight	20.5 kg
Gross weight	24 kg
Height	495 mm
Width	220 mm
Depth	435 mm
Device warranty	2 years
Filter feature	Table top, With mineralisation, With heating function, With cooling function
Responsible manufacturer	**OPUS Sp. z o. o.** Polska 44-122 Gliwice Toruńska 8 info
