Cardboard perforator - OPUS chartiPACK CP

Catalogue number: 906246

Description

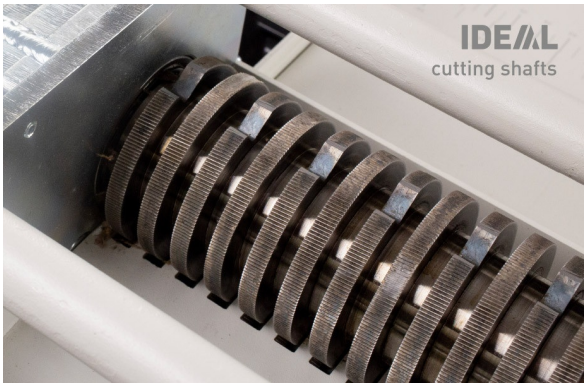
CARDBOARD FILLERS WITH YOUR OWN CARDBOARD SHREDDER

Reduce storage costs and waste generation - produce your fillers yourself! Opt for **sustainability** in your parcel packaging and instead of discarding, utilise used cardboard boxes and recycle them into **full-value environment friendly fillers** that are renewable, recyclable and compostable. With the **ChartiPACK CP cardboard shredder, you can reliably secure every shipment**, and you can easily cut costs, save on storage space and

take a big step towards protecting the environment.

CHARTIPACK CP CARDBOARD SHREDDER – SUPERFAST ZERO WASTE OPERATION

ChartiPACK CP is an **extremely efficient** cardboard shredder that enables quick preparation of strong, flexible and environmentally friendly parcel fillers without the need to buy additional consumables. Give used cardboard boxes new life and transform them into parcel filling material. **The machine's compact size, operating speed of 13.2 m/min** and excellent value for money make the ChartiPACK CP shredder an excellent choice for any **warehouse**, **logistics** centre, **e-commerce shop** or any other business that ships **large volumes of parcels**.



HIGH QUALITY CUTTING SECTION FROM KRUG + PRIESTER

The cutting section in ChartiPACK CP is provided by **Krug + Priester**, who deliver the robust **IDEAL** and **EBA** brand shredders renowned for their **reliability** and award-winning **quality**. The cutting system is manufactured in accordance with firm company standards: the knives are made from a **single block of steel**, which ensures great **strength** and **perfect cutting**. The knives, the heart of the machine, are a top-class product!

TRANSPORT FILLERS – FAST AND MADE TO MEASURE

ChartiPACK CP operates at a very high **speed of 13.2 m/min**, placing it at the top of the ranking of similar devices. The device primarily cuts the cardboard to a **width of 402 mm**. The outstanding width is automatically cut off. If you need a **smaller** cardboard **width**, use the additional magnetic limiter and the convenient scale on the device. **Make made-to-measure filler!** The **12 mm** high feed slot enables cutting of virtually **any cardboard**.

CARDBOARD COMPRESSION – ADJUST THE FILLER VOLUME

The device is provided with a **compression flap** which enables adjusting the volume of the filler. Depending on your needs and the type of product to be shipped, you can either prepare a **tough, compact mat**, which has **greater strength and resistance** to edge or corner creases, or a **lightly fluffed cardboard filler**, which due to its greater aeration becomes more flexible and better absorbs shocks during transport. When the flap is locked in the top position, the cardboard is not compressed. If it is in the bottom position, the cardboard is compressed. Cut as you need!

THERMAL AND DUST PROTECTION

Thermal safeguards protect the device against motor overheating, while the shredder electronic system and drive are tightly encased so that no dust generated during cardboard cutting can get inside. What's more, the device is also provided with a **cleaning system** for removing material residues and dust from the cutting section. The **intuitive control panel**

provides simple operation and quick access to functions such as **reverse run** or **immediate stop**.

IMPROVE WORKING COMFORT WITH ADDITIONAL ACCESSORIES

A stand that is perfectly matched to the weight and size of the ChartiPACK CP shredder can be purchased. The **stand** is set **on lockable wheels**, so you can easily position it anywhere and easily move it to another room if necessary. Another accessory available for the shredder is a **trolley on wheels**, also with a locking option. The trolley has a convenient handle and fits perfectly between the legs of the stand. The trolley is intended for the cardboard box into which the filler goes. The last accessory available is an adapter for attaching a dust collector or a vacuum cleaner. The adapter has a 37 mm diameter socket.

BE SMART – USE ALL THE POSSIBILITIES!

Having your goods neatly, quickly and sustainably packaged is the best calling card of any merchandiser. With ChartiPACK, you can now prepare paper and cardboard fillers at your premises in no time.

ADVANTAGES OD THE CHARTIPACK CP SHREDDER

- very fast operation at 13.2 m/min
- strong Krug + Priester cutting knives
- compact size
- cleaning system for removing material residues and dust from the cutting section
- thermal safeguards

- intuitive control panel
- compression flap for adjusting filler volume
- convenient carrying handles
- robust powder-coated housing
- **Two shredder models are available:** with 230 V single-phase and with 400 V three-phase electricity supply. Device specifications are the same for both models.
- Optional equipment includes an adapter for attaching a dust collector, a **stand on wheels** and an additional **trolley with a filler collecting cardboard box**.

Parameters

Brand	chartiPACK
Maximum speed	13.2 m/min
Power	1550 W
Pedal switch tap	no
Net weight	75 kg
Gross weight	85 kg
Height	296 mm
Width	782 mm
Depth	564 mm
Device warranty	2 years
