Business shredder

Shredder - OPUS TS 2314 CD / 2 x 12 mm

Catalogue number: 510573

A modern micro-cut paper shredder designed for shredding of confidential and secret documents (P-5 security level according to the ISO/IEC 21964 standard).

Description

Higher level of security. Better data protection.

A leak of confidential data can mean financial losses, image problems, and a violation of data protection regulations. Therefore, it's worth choosing a shredder that provides **real information protection** while streamlining daily office operations. The **TS 2314 CD** is such a model. This is a business shredder that provides a **high level of P-5 security**. Thanks to the **micro-cut** cutting system, documents are shredded into **2 × 12 mm** pieces, which significantly complicates the recovery of information after shredding.

Security level P-5 – for whom is the TS 2314 CD a good choice?

The P-5 data security device is ideal for use in locations where data security is crucial, including:

- law and notary offices,

- accounting and tax offices,
- medical facilities,
- HR and administration departments,
- financial institutions,
- public administration units,
- companies processing personal data of clients, employees, or contractors.

When documentation contains personal or financial information, or when we are talking about contracts, HR documents, or confidential correspondence, effective data destruction is of paramount importance. The higher level of security provided by the shredder means much better protection against data leaks than in the case of devices with a lower level of protection.

High work efficiency every day

The TS 2314 CD shredder is designed for regular office use. It shreds up to 14 sheets of 80 g/m² paper at a time, and its hardened steel blades easily handle staples and paper clips. This means you don't waste time preparing documents before shredding.
Furthermore, the device also shreds CDs/DVDs and payment cards.

Intuitive operation via a clear panel

The modern control panel located on the head allows you to quickly start the device or remove a jammed document. Forward mode helps you efficiently oil the cutting knives, and the device automatically turns off after 15 minutes of inactivity. Colored LEDs provide real-time information about operating status, overheating, paper jams, and when the bin needs to be emptied.
An additional advantage is the automatic cleaning function for the cutting knives, which activates after 50 shredding cycles. This helps

maintain high performance and extends the life of the cutting mechanism, reducing the need for servicing.

Spacious waste basket and easy movement of the shredder

The large 33-liter bin allows you to focus on work instead of cleaning – with a small volume of shredded material, you don't have to empty it as often. **The transparent window** allows you to quickly check the bin fill level, and a red indicator on the control panel indicates when the bin is full.

The shredder is also equipped with swivel casters, allowing you to easily move it to where you need it.

What are the benefits of the TS 2314 CD business shredder?

- High security level P-5 – effective data protection.
- Shreds paper, CDs/DVDs, and payment cards.
- Micro-cut – shreds paper into tiny 2 x 12 mm pieces.
- Shreds up to 14 sheets of paper at a time.
- Staple-resistant knives and paper clips.
- Automatic blade cleaning extends the life of the device.
- Intuitive control panel with status messages.
- Large 33-liter basket – less frequent emptying.
- Easy to move thanks to swivel casters.

Take care of data security in your company

Investing in robust, high-security equipment reduces the risk of confidential information leaks and improves daily office workflow. This solution is especially effective for companies that treat data security as part of professional management and want to protect both their own data and their customers' data.

Parameters

Brand	OPUS
