Business shredder

Shredder - OPUS TS 2328 CD / 4 x 40 mm

Catalogue number: 510566

A modern cross-cut paper shredder designed for shredding of documents (P-4 security level according to the ISO/IEC 21964 standard).

Description

Effective document shredding in daily work

Information protection is a crucial element for the efficient operation of any company. Whether dealing with HR documents, customer data, or internal correspondence, secure destruction **minimizes the risk of confidential information being leaked**.

The **TS 2328 CD business shredder** combines ease of daily use with a high level of data protection – **P-4**. The device employs a **cross-cut** shredding system, reducing paper into **4 × 40 mm** fragments, which makes reconstructing the documents significantly more difficult. This shredder is well-suited for offices, secretariats, medical practices, and various customer service points where documents containing personal data or corporate information need to be destroyed.

Data protection in the office – it's easy with a good shredder!

A paper shredder with a P-4 security level is a sound choice for companies that require effective document protection, but do not need the highest security levels—such as those used by government agencies or large corporations for the destruction of top-secret information.

The TS 2328 CD is well-suited for use in settings such as:

- accounting and bookkeeping firms,
- administration and HR departments,
- service and commercial businesses,

- law firms and customer service offices,
- educational institutions,
- enterprises that process the personal data of clients and employees.

Efficiency that makes work easier. Shred up to 28 sheets at once!

The TS 2328 CD shredder is designed not only for the routine destruction of individual office documents but also for handling larger clean-up tasks. It can shred up to **28 sheets of 80 g/m² paper** at once, allowing you to quickly dispose of a substantial volume of documents without needing to break them down into smaller batches. Furthermore, the device can **shred CD/DVD discs and payment cards**, while its hardened steel cutting blades are also capable of handling **staples and paper clips**.

Simple operation and features that make work easier

An intuitive control panel located on the shredder head simplifies daily operation: it allows you to quickly start the device or reverse a jammed document, while the forward-run mode facilitates the efficient lubrication of the cutting blades. **Colored LED indicators** provide information on the device's current status—such as overheating, a paper jam in the feed slot, or the need to empty the waste bin. This enables you to respond promptly to any issues, ensuring the device remains in optimal condition and ready for use.

Spacious bin and convenient mobility for the shredder

A large **33-litre waste bin** allows for document shredding without the need for frequent interruptions to empty the container. A transparent window makes it easy to monitor the fill level, while an indicator on the control panel alerts you when the bin is full.

The shredder is also equipped with **swivel casters**, which make it easy to move around. This allows you to quickly position the device wherever it is needed and adjust its placement to suit your office layout.

Why should you choose the TS 2328 CD shredder?

- Security level P-4 – suitable for destroying office documents.
- Cross-cut shredding – blades shred paper into small pieces measuring 4 × 40 mm.
- Capable of shredding up to 28 sheets of paper at once.
- Can destroy not only paper but also CDs/DVDs and payment cards.
- Blades are resistant to staples and paper clips.
- Intuitive control panel and clear status indicators.
- 33-liter waste bin, reducing the frequency of emptying.
- Swivel casters for easy movement of the device.

Ensure data protection in your company

The right paper shredder helps streamline the document disposal process and reduces the risk of data leaks. The TS 2328 CD is a practical solution for companies that need an efficient device for the daily destruction of paper, CDs, and payment cards. With the capacity to shred up to 28 sheets at once, it allows for the efficient disposal of large volumes of paper, while its P-4 security level

ensures effective protection for the data of clients, employees, and the company itself.

Parameters

Brand	OPUS
Shred size	4 x 40 mm
