Professional binding machine

Binding equipment - OPUS MB 300

Catalogue number: 604005

The OPUS MB 300 is the flagship of OPUS binding machines for professionals.

Description

MB 300 – MODERN CHANNEL BINDING EQUIPMENT

MB 300 is a modern **manual channel binding machine**, enabling **binding and unbinding** documents in the **METALBIND** and **C-BIND** systems (additional inserts are required). The device binds documents up to 300 sheets thick, which allows you to prepare both small-volume presentation materials and large catalogs. The binding machine allows for **electronic regulation of binding force**, the value of which is displayed on an indicator. **A solid construction in a metal housing** ensures stable operation and durability of the device. **MB 300** is recommended for **offices** or for **small and medium-sized service points**.

SOLID AND AESTHETIC BINDING IN SYSTEMS:

METALBIND I C-BIND

METALBIND is an innovative binding system that provides documents with a perfect appearance and reliable security, while also allowing complete freedom in choosing the front and back covers and the channel. Binding is done without the use of glue, stapling, or paper punching – instead, the cover and pages are placed in a metal channel. The contents of the documentation are held by the sloping rear wall of the channel, while the front wall never deforms. In the **C-BIND** system, the covers form a single unit together with the channel, which is clamped on both sides. Unlike the METALBIND system, the channel is located inside the cover.

DEBINDING IN THE CHANNEL SYSTEM

Because channel binding systems are **non-invasive**—no punching, stapling, or glue required—pages, covers, and channels remain **intact**. Therefore, you can easily **debind and rebind** a document: you can add or remove pages, correct errors in the documentation on the fly, or replace covers and channels.

COMFORTABLE OPERATION AND BINDING FORCE ADJUSTMENT

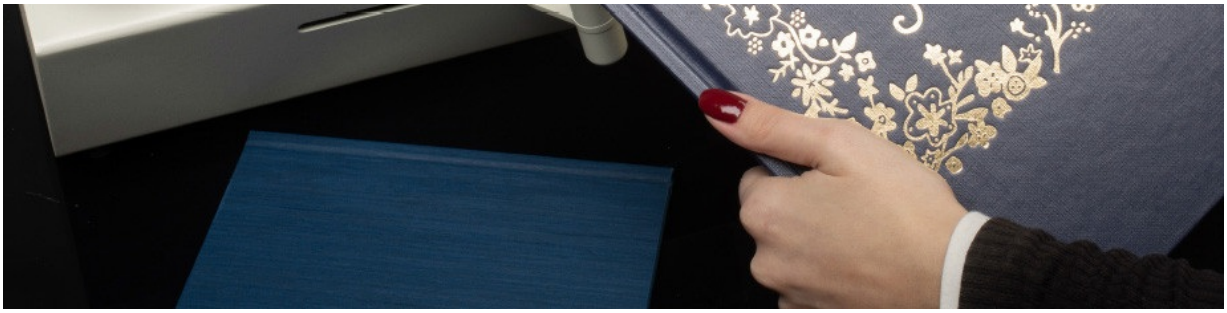

You can easily operate the device using the lever. Furthermore, the MB 300 is equipped with a binding force indicator. By pressing and holding the button, you can change the set parameter – this way, you will always select the best clamping force value for the documents being bound. Furthermore, the device remembers the last set value to achieve the same, repeatable binding results for subsequent documents.

EASY CHANNEL AND COVER SELECTION

The binding machine features a **magnetic** channel selection device for the **METALBIND** system and a **C-BIND** cover selection device, which allows you to easily match the appropriate channel or cover to the number of sheets you want to bind. You can reuse the same channel and covers – for example, after unbinding a document to add a few sheets.

LARGE SELECTION OF COVERS AND BINDING PERSONALIZATION

With the **MB 300** channel binder, you can bind documents in various types of covers: hard, soft, transparent, in various colors, sizes, and textures. You can use both **METALBIND** and **C-BIND** covers. It's also possible to create a **personalized binding** using **matrices** and **fonts** – you choose what's on your cover!

ADDITIONAL ACCESSORIES

The device comes with accessories for binding and debinding in the **METALBIND** system: a magnetic channel/cover size selection tool that can be attached anywhere on the housing; a movable stop for smaller format bindings; a debinding wedge and an attachment for debinding channels 1.5 mm - 3 mm; a narrow (for channels from 20 to 32 mm) and a wide (for channels up to 16 mm) binding insert. There are special compartments on the back of the device for storing accessories.

NOTE! To use the binding machine in the **C-BIND** system, you must purchase the appropriate **additional accessories**: O.CB Pivot Inserts for Atlas 300 / MB 300, O.CB Debinding Tool for Atlas 300 / MB 300 / MBE 300, and an attachment for debinding AA channels.

CREATE MATERIALS THAT MAKE AN IMPRESSION – WITH THE MB 300 CHANNEL BINDING MACHINE!

Well-bound documents are the foundation of good office organization. They're also the calling card of any company – professionally prepared sales and presentation materials build customer trust from the very first moment. With the modern MB 300 channel binding machine, you'll achieve this effect in no time!

ADVANTAGES OF THE MB 300 CHANNEL BINDING EQUIPMENT

- METALBIND and C-BIND system compatibility
- Easy selection of channel and cover sizes
- Maximum binding capacity: 300 sheets (80 g/m²)
- Adjustable binding force
- Fast binding
- Perfect binding appearance, wide range of covers and channels
- Document security – binding without glue, stapling, or punching

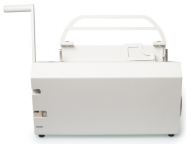

Parameters

Brand	OPUS
Binder type	channel
Maximum binding format	A3 (short side only)
Maximum number of bound pages*	300
Operation type	manual
Metal housing	yes
Net weight	19 kg
Gross weight	22 kg
Height	270 mm
Width	530 mm
Depth	320 mm
* tests made on paper	80 g/m²
Device warranty	2 years
Feature / purpose	Manual binding machines, Office binding machines, Professional binding machines
Binding system	METALBIND, C-BIND
