Paper trimmer

Rotary trimmer - OPUS roloCUT A3

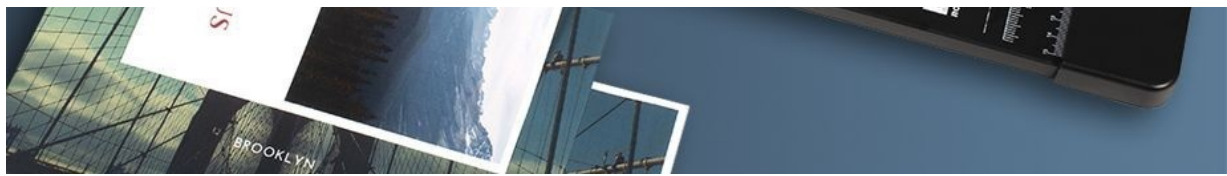

Catalogue number: 300150

The most inexpensive A3 rotary trimmer for homes and small offices.

Description

RoloCUT A3 CIRCLE ROTARY TRIMMER - PRECISION CUT IN ONE MOVE

The OPUS RoloCUT A3 rotary trimmer is an easy and convenient to use device designed for cutting paper. A solid structure, self-sharpening cutting elements, markings of popular formats on the table top and a cutting line with a length of 460 mm will make the device widely used both at home and at work. Thanks to the disc cutter, you can prepare beautiful photo albums, cards, invitations, as well as flyers, posters, business cards, letters or documents - everything that requires a precise and aesthetic cut.

GET THE FORMAT YOU NEED

The data on the formats and dimensions on the metal base will significantly facilitate your work with the device and allow you to cut the paper according to your needs. On the table top of the cutter you will find a millimeter and inch scale, a protractor, and also markings of the most popular formats, such as: A3, A4, A5, or photo formats: 13 x 18, 10 x 15 or 9 x 13 cm.

SIMPLE OPERATION, EASY CUT

The paper should be properly placed on the table top so that the target line of cutting the sheet coincides with the edge of the cutting strip. The material will be cut after the mounted rotary blade head is moved along the guide. You can cut a maximum of 4 sheets of 80 g/m² at a time.

COMFORTABLY AND STABLE

The RoloCUT A3 rotary disc trimmer is a stable and handy device. It has a blade that moves in both directions, allowing you to cut the paper with one push/pull. Non-slip feet prevent the equipment from moving during operation, which ensures maximum comfort when using the cutter. At the same time, the device is extremely light - weighing about 1 kg, making it easy to move or hide.

BIGGER FORMAT, MORE POSSIBILITIES

The rotary trimmer allows you to cut **paper with a maximum length of 460 mm**, thanks to which it will perfectly handle the processing of photos, posters or documents with non-standard dimensions, larger than A3 size.

ONE DEVICE FOR MANY YEARS

The highest quality materials, from which the paper trimmer was made, will allow for trouble-free use of the device for a very long time. The blade and the trimming bar are made of high-quality steel, and the shape of the cutting elements causes their **self-sharpening**.

GUARANTEE OF SAFETY

The paper cutting tool is completely safe to use. The rotary blade is embedded in a special cartridge which protects fingers from contact with sharp elements, and the design of the guide prevents the head from moving on its own. The fact that the blade does not need to be replaced further reduces the risk of injury.

FOR HOBBYISTS AND PROFESSIONALS

OPUS RoloCUT A3 trimmer is widely used at home, in the office and other institutions, where **letters, documents, printouts, flyers or business cards** are prepared. With the trimmer you can cut, trim or trim paper in any way you like, while maintaining a **perfectly straight cut line**. Such a tool is an irreplaceable help in **decorating albums, cutting photos, creating cards** and other projects, where **aesthetics** is important.
